Tunstall's Residence was one of the first projects that we did in Savannah. We worked alongside the owner to restore this historic home that had been deserted for years. The finished product was amazing, and satisfying. Many folks in the neighborhood were elated that the derelict property was restored. Members of the Historic Savannah Foundation came through the building to view the restoration. This was a great beginning for Commonwealth in Savannah. And we greatly enjoyed working with Mr. Tunstall and his family.
