

Locos Grill and Pub restaurant was a large commercial job we completed on Savannah's south side located in the Abercorn Commons Shopping Center. During this project we had the pleasure of working with Catamount Constructors, along with Melaver Development, who developed and constructed Abercorn Commons. Our major involvement in this project included the complete interior build out. This was our first opportunity at working toward a LEED certified building, and is now possibly the first restaurant in the country to receive the LEED Certified Accreditation.
